letter	3751-F/44-1 R		14-11-1904				
Rns	1654	Rev	31.7.46				

Extract of the letter from Sri. A.B. Shetty, Attavar, Mangalore, dated 19th February 1944.

The Council may consider again the possibilities of increasing food production in Malabar and South Kanara by providing irrigation facilities atleast on a minor scale. The following are some of the possibilities of improving the water supply in these two districts --

(1) Putting embankments and sluices for rivers wherever this is found feasible.

(2) Temporary anicuts for small rivers or perennial streams during summer for irrigation purposes.

(3) Removal of silt from old, neglected tanks and putting dams and sluices.

(4) Opening up tanks and wells in suitable places for lift irrigation.

rain water that is washed down to the sea and wasted at present may be conserved and stored up in several places by putting dams and it may be utilised for cultivation purposes.

The repairs and renewals of about two dozen tanks and madas (water reservoirs) are said to have been discussed at the Periodical Conference in Mangalore on 6th November 1943, but no action could be taken for want of expert investigation and formulation of a scheme. The matter is said to have been reported to the Board accordingly. A minor irrigation staff may be immediately appointed in Malabar and in South Kanara for formulating and working out a scheme of minor irrigation facilities for 'Grow More Food' purposes. The West Coast has too long been neglected in this matter.

Communicated to the Revenue Dept. for favour of
notes before 25th March 1944 for inclusion in the agenda of the meeting
of the Provincial Food Council to be held in
April 1944.

Irrigation – Malabar and S. Kanara dts

Improving water supply

From Sri A.B. Shetty, letter dt 19-2-1944.

Fl: 1-2 CF

ni: 2: 1

An extract of letter from Sri A.B Shetty quoted above on the subject of repairs to irrigation tanks in the districts of Malabar & S. Kanara is forwarded to the Board of Revs. The Board is requested to submit a report very urgently ~~before~~ [illegible] on the subject of repairs to tanks referred to above and also to offer its remarks on the suggestion to appoint a M.I. Staff for working out a

scheme of M.I. facilities for A.R.P. purposes.

The attention of the Board of Rev
is in this connection invited to Memo. No. 6
322E/43-1 dt. 18-12-43. in which the Coll.r of Malabar may be seen by
has been asked to state what help Govt. is
to receive in respect of schemes already started by the
Municipalities in Ponnani, Kozhikode, Calicut, Kozhikode, Calicut.

Not put up.

Extract of para.2 of letter dated 18th March 1944 from Sri A.B.Shetty, Attavar, Mangalore, to the Addl.Secretary to Govt. Development Department, Madras.

Subject: Provincial Food Council - Subjects for April meetin_

---

2. Minor irrigation schemes which promise quick results may be taken up in South Kanara and Malabar. The Collector of this district can furnish a list of the tanks and water reservoirs which we have in various taluks. Investigation by an Engineering Staff is necessary to find out which of these tanks can be repaired and utilised for providing irrigational facilities to the neighbouring fields. Our District Food Council has, at its meeting on 28-2-1944, passed a resolution requesting Government to immediately appoint a minor irrigation staff to formulate and work out a scheme for providing additional water facilities for "Grow More Food" purposes in South Kanara. The Collector must have forwarded this resolution to the Adviser.

From the Government, Revenue Department, Memorandum No.900-F/ 44.3, dated 24-3-1944.
From the Collector of Malabar L.Dis.6009/44 dated 4-4-1944.
From the Collector of South Kanara Ref.C.B5.8115/43, dated 16-4-1944.

---.

REFERENCE.

The Collectors of Malabar and South Kanara were consulted in the matter and copies of their reports are enclosed. The Board recommends that in the case of South Kanara district, a Minor Irrigation staff of one Minor Irrigation Supervisor and two Minor Irrigation Overseers may be sanctioned temporarily for a period of six months for investigation of the 21 schemes on which Revenue Divisional Officers have reported and for the investigation of any further repairs or small schemes which may be brought to his notice. The employment of 3 lascars to work under the Minor Irrigation Supervisor and the two Minor Irrigation Overseers may also be sanctioned. The Board recommends one Minor Irrigation Supervisor as technical problems are likely to be stiffer than in the ordinary district. As regards Malabar district, the Board will submit a further report about the possibility of working out schemes in the district referred to in para 2 of the Collector's letter dated 4-4-1944.

--

Irrigation - Malabar and South Kanara districts - Improving water supply - Remarks - Offered.
Ref:- Board's Ref.W.2018/44.1, dated 16-3-1944.

Mr.Shetty, who comes from South Kanara is apparently not acquainted with conditions in this district and has presumably lumped Malabar with South Kanara as part of "West Coast". There are no minor irrigation tanks in this district and there is no prospect of forming any . Such schemes as are under examination are comparatively large works, which would, if and when accepted, have to be in charge of the P.W.D. The one or two smaller works which are under examination are of the nature of keeping out salt water, not of storing rain water. ~~fxxxx~~ The need for Minor Irrigation Staff has not arisen yet, and is hardly likely to arise.

2. In this connection I also invite Board's attention to

Sd. xx xx
for Collector.

II.

From Rao Saheb Sri P.Ramadoss B.A., Collector of South Kanara
Letter No.Ref.C.B5.8115.43, dated 16-4-1944.

Irrigation - Malabar and South Kanara districts - Improving water supply - Report submitted.

Ref:- 1. Board's reference No.2018-44.1, L.R.& I. dated 16-3-1944.
2. Board's reference No.2018-44.2 dated 30-3-44.
3. Board's reference No.2018-44.3 dated 12-4-44.

At the periodical conference held on 6-11-1943, the question of repairs and renewals of the Madagas and tanks noted in the enclosed list was discussed. It was resolved then that as there was no minor irrigation staff in South Kanara, a general scheme for the whole district could not be worked out. It was also resolved that individual cases would be considered on their own merits. A report to the Board was submitted to that effect in this office Ref.B5.2302/43 dated 18-11-1943.

2. The names of about two dozen Madagas, referred to in Mr. A.B.Shetty's letter were furnished by the Revenue Divisional Officers. The remakrs of the Revenue Divisional Officers about the advisability of repairing each of the Madagas and the benefits that would accrue by the repair are noted against each Madaga in the list enclosed.

3. But as there is no minor irrigation staff in South Kanara no investigation could be done with regard to the details and the cost of repairs etc., before the scheme is put into force. The matter was, however, referred to the Executive Engineer, West Coast Division, Calicut for his views on the advisability of taking up the repairs and renewals and on the nature and strength of the staff required for that purpose. His reply has not yet been received.

4. As the scheme will have to be investigated before the monsoon sets in, I consider that two minor irrigation overseers with a lascar under each will be required.

Sd. xx xx
For Collector.

Lists of tanks and Madagas.

Karkal Taluk Names of the Madagas and tanks.	Remarks.
(1) Lakkeshwari Katta - This is in Nittade village across the river running through Aladangady to Venur. There are valid reasons why no genuine attempts were made either to reconstruct or to repair the old dam in this site. The so called rivers of this locality are just like streams which practically dry up during summer. This stream takes its source in the peaks of the western ghats closeby. As there is abundent rainfall in this region during the monsoons this shallow and narrow river swells resulting in heavy floods causing thereby much harm and havoc to the fields situated on both sides of the river. The features of the streams in these places are such that they are easily susceptible to frequent occurrence of floods. Construction of permanent dams anywhere across the streams is likely to prove fatal to the fields situated on either sides of the rivers.

ENCLOSURES _____

SPARE COPIES _____

(2) Thumbe hithlu Katta (Mirgan village).
(3) Mattibettu (Mudradi village)

These can be easily repaired and water from these minor irrigati projects utilized for bringing a considerable extent under cultivation of food crops. The neighbouring ryots who will be benefited by these dams are reported to be willing to co-operate

(4) Ummannabettu (Between Gunduri and Arambodi villages) This is across the Angarakariya stream. There is an extensive level plateau adjoining this river which is now assessed waste and even without any tree growth. A dam across this will bring about 75 acres of land into double crop wet lands which ma produce rice, vegetables and cocoanuts.

(5) Kukkuje Mannadke dam (Naravi village) This will not only bring about 60 acres of assessed waste lands into Bail lands but will enable another 50 acres of warg land to raise two or three crops. This will be helpful to the cultivators of Sulkeri

(6) Kokunja Kundru scheme (Mala village) - Vide remarks against items 2 and 3.

(7) Kontyadka (Mijar village) - A dam in this place will be helpful to cultivate 20 acres of Government waste lands and also another 20 acres of warg land thus increasing the veild of food crops by 50 tons of rice.

(8) Kodiyalamala Reserve tank - This tank can irrigate about 200 acres. This is in the Reserve Forest Area.

(9) Kochikere Tank (Mala village) - This is in a dilapidated condition which if repaired will irrigate about 50 acres of land yielding 25 tons of rice.

MANGALORE TALUK.

(1) Kudrabettu dam (Mundkur village) - This is similar to Thumbehithlu dam. There is a granite bed and stones can be had nearby. A temporary dam is put at the present ayacut is abo 50 acres but with a good foundation and a bigger and stronger tem porary mud dam the ayacut can be increased to 200-300 acres. Supply channels have to be dug. Paddy, pulses, sugarcane, vegetables and cocoanuts can be grown.

(2) Mundkur dam (Mundkur village) - This is not a mamool dam but it was permitted on two or three ocassions. It is feared by the people lower down and who are benefitted by another dam at Phalimar that this dam if put up will reduce their supply. But it is found that enough water is available. This dam is abo 4-5 miles above the Phalimar dam and 6-7 miles below Kudru-bettu dam and thus storage is adequate for all these dams. The putting up of this dam is very helpful. This is the best area i the district where cultivation of paddy, sugarcane and vegetable is done under lift irrigation and if this dam is put up the production of food crops can be increased tremendously.

COONDAPOOR TALUK.

Herejere (Kandavara village) - This Madaga measures in all 36.73 acres and is in a dilapidated condition. During the rainy season rain water stagnates over a portion of the madaga and in summer it goes dry. Earth over an extent of about 30 acres has to be removed to a depth of 2 to 3 fathoms to render the tank useful for cultivation. If the tank is repaired it may irrigate II crop cultivation on about 400 acres of wet land.

UDIPI TALUK.

(1) Chantar Madaga. It is a huge reservoir of water which has silted up in course of years and is capable of, if restored of supplying about 500 acres of fields with water to enable to raise wet cultivation on them. The Madaga has a catchment of half square mile and the cost of repairing it is estimated at Rs.15,000/-

PUTTUR TALUK.

(1) Tank at Kadaba.
(2) Tank at Bellare
(3) Tank at Bogayanakere
(4) Tank at Paranki.

It is reported that these can be used as sources of water supply for the cultivation of the adjoining wet lands into double crop and dry crops in wet lands.

KASARAGOD TALUK.

(1) Water courses in Chervathur village - It is possible to irrigate over 1000 acres of paddy land for raising II crop by opening a channel so as to divert the water flowing through a stream on the southern side. It has been reported that it is possible to increase the yield of paddy by at least 500 tons in each year if this work is taken up.

(2) Diversion of water by channels from the Payaswani river - It is reported that it is possible to cultivate the adjoining lands and obtain more food crops.

(3) Shirya dam - The project can enable cultivation of about 1000 across in the third crop season.

(4) Angadipuram dam.

Sd. xx xx
for Collector.

pleader doing Government work in Mofussil relating to the several kinds of suits to which Government is a party or in which Government is interested pass through the Divisional Offices and for offering their remarks whenever necessary on such references, the book Civil Rules of practice will be necessary. Moreover there is a likelihood of some work arising under the Estates Land Act, as it has been extended to apply to shrotriems also. The use of the book will be very occasional but its supply to the Revenue Divisional Officers appears desirable in the circumstances stated above.

The draft order may be accepted. The cost involved is Rs. 2489 for six months. As the cost exceeds Rs. 1500 r.g A I should see.

PTO

It appears to me from pages 12 to 14 of that some of the schemes may be impracticable, and that a preliminary survey is necessary as to the feasibility of a scheme, before a detailed estimate is prepared. Two officers appear to be sufficient for the purpose. The Coll himself has asked for two I.I.S. only. The Board has added one I.S. It may be that an I.S. is required but I may suggest that the staff be limited to 1 I.I.S., 1 I.O. and 2 lascars for a period of 3 months. Within the period it should be possible to find out what works can be taken up, and the question of posting the staff for preparation of estimates can be taken up afterwards.
